

# ENVIROCOOL

## SOLAR SCREENS

### Feel Cool, Look Great!

## Cooling. Glare Reducing. Efficient.

EnviroCool Solar Screens are energy and cost efficient screen in our premier family of Exterior Energy Efficient Products.

EnviroCool is a sensible and very affordable way to reduce energy consumption and protect the interior of your home or business against the harmful effects of the sun. Solar Screens are **MORE EFFECTIVE** than indoor window shades or window tint and they block heat transfer that occurs through the windows. This not only lowers your utility bills but maintains your view to the outside.

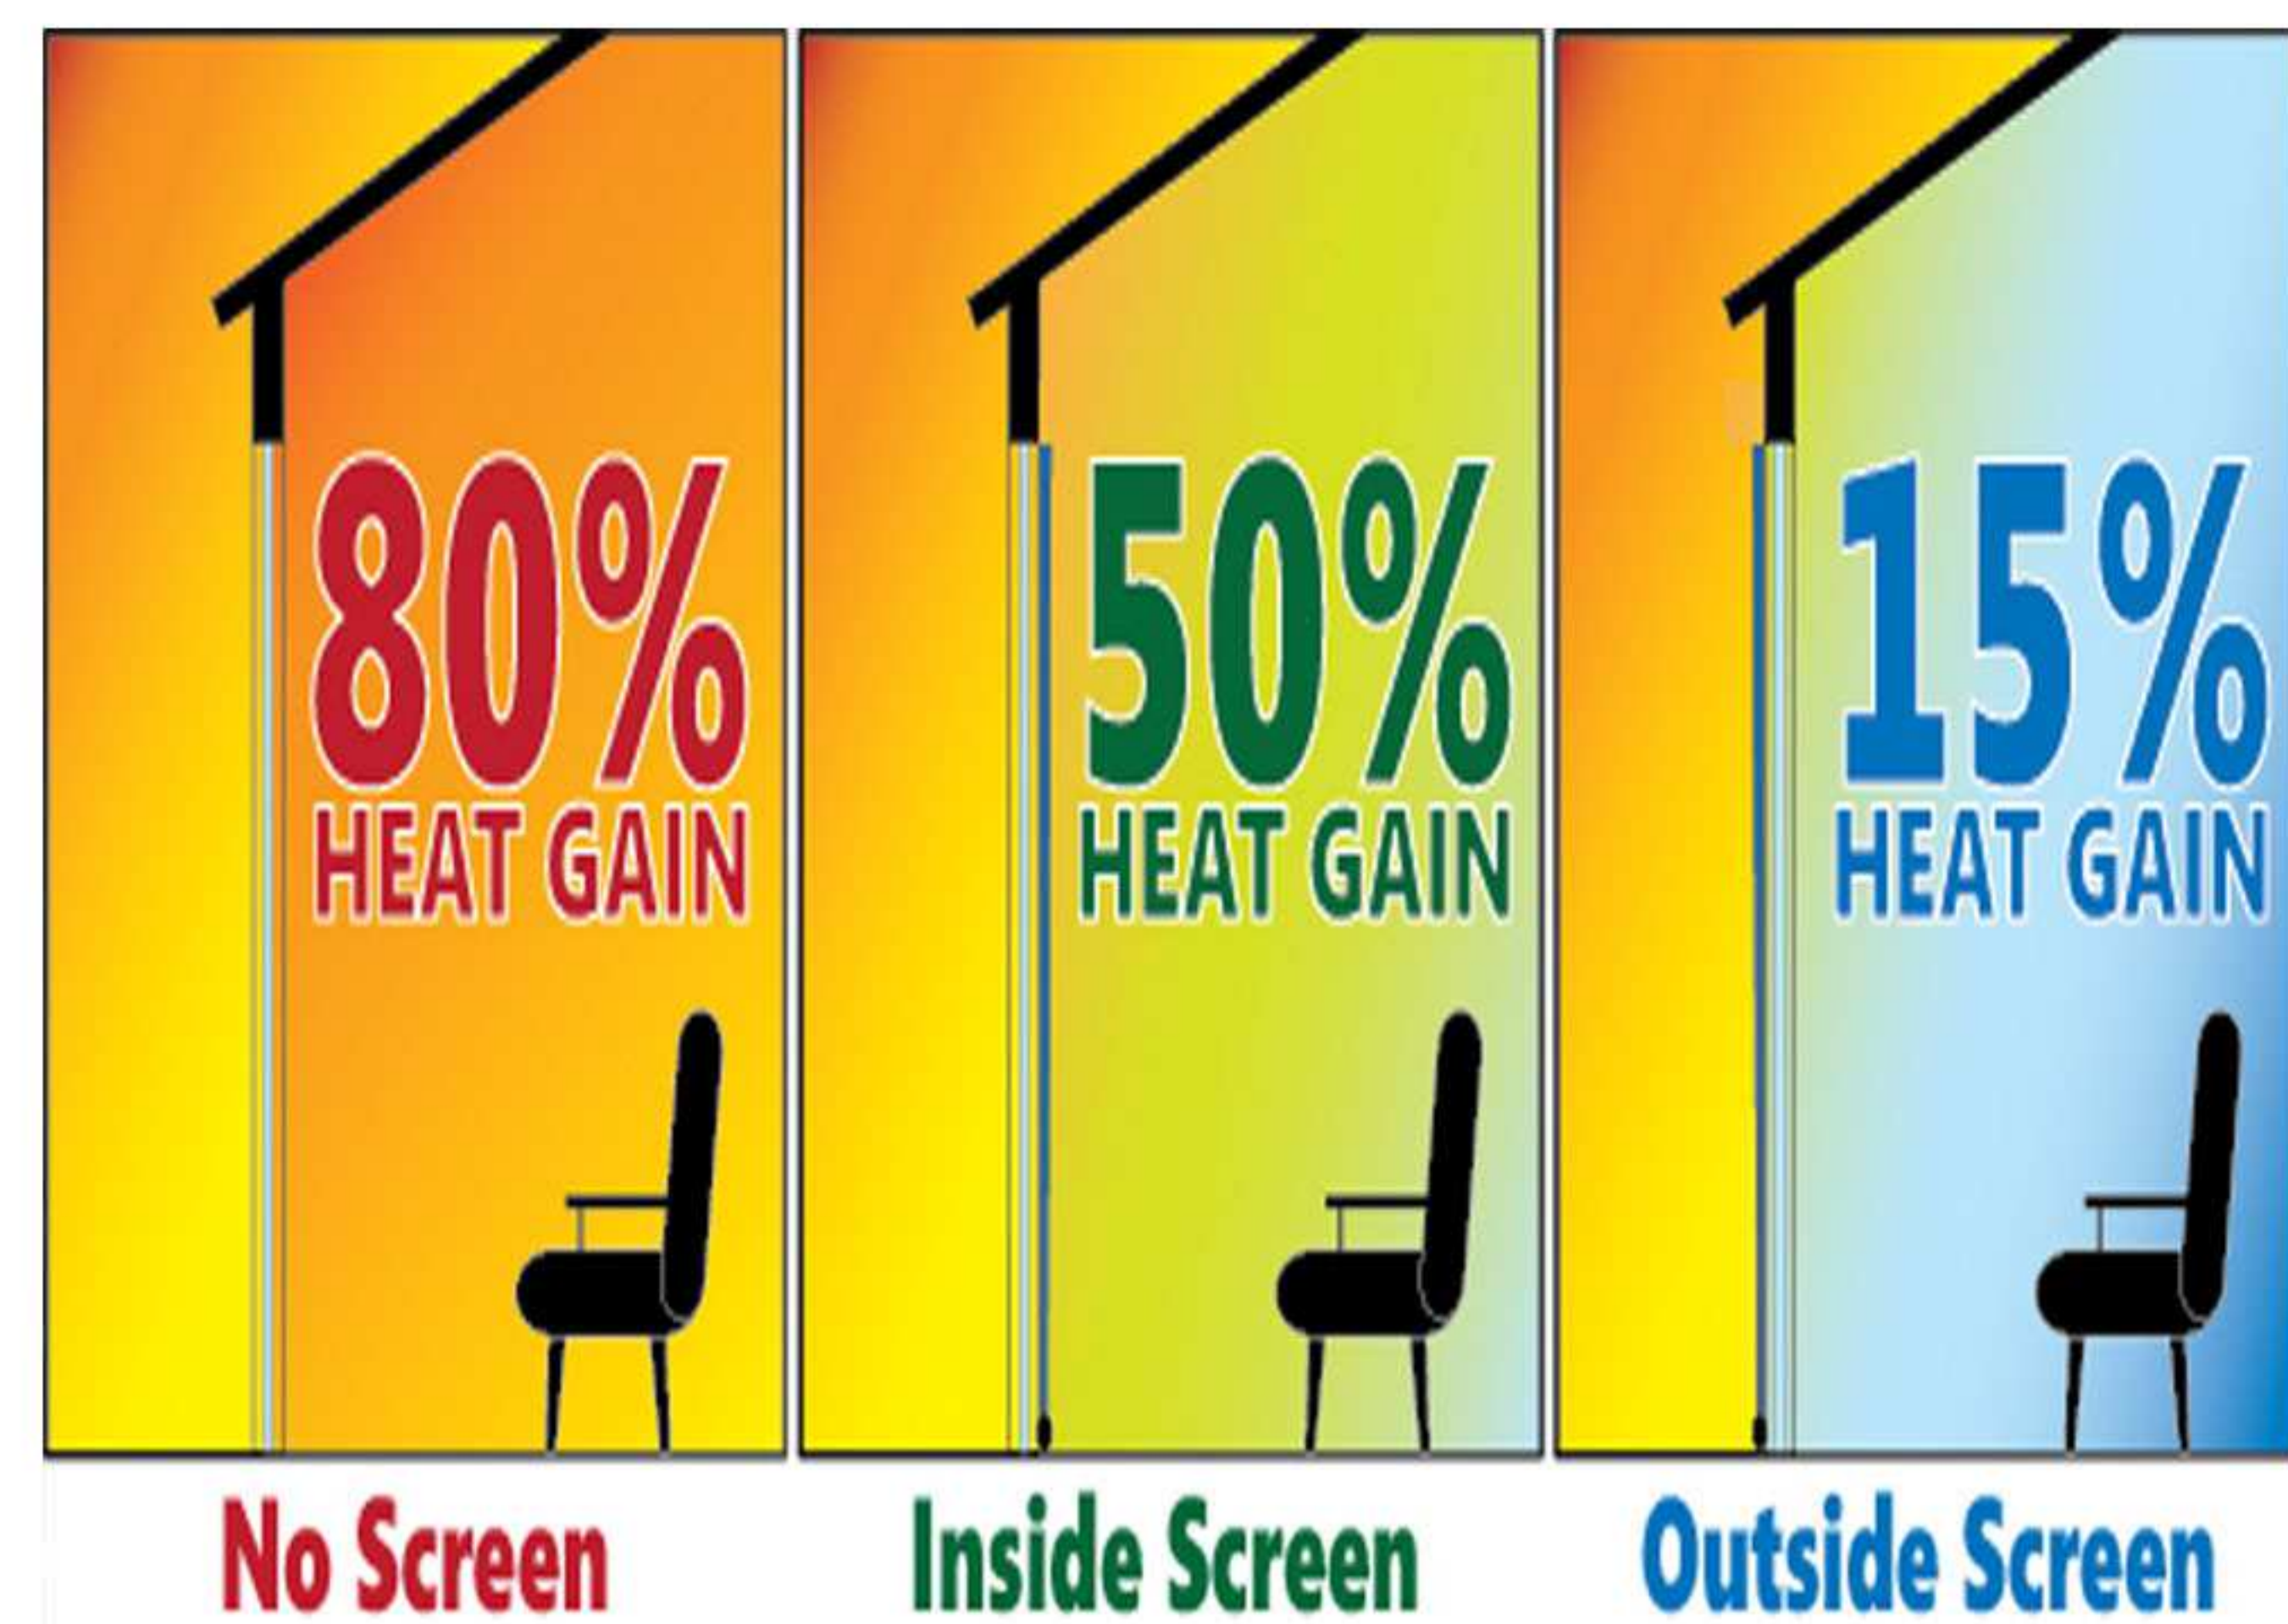

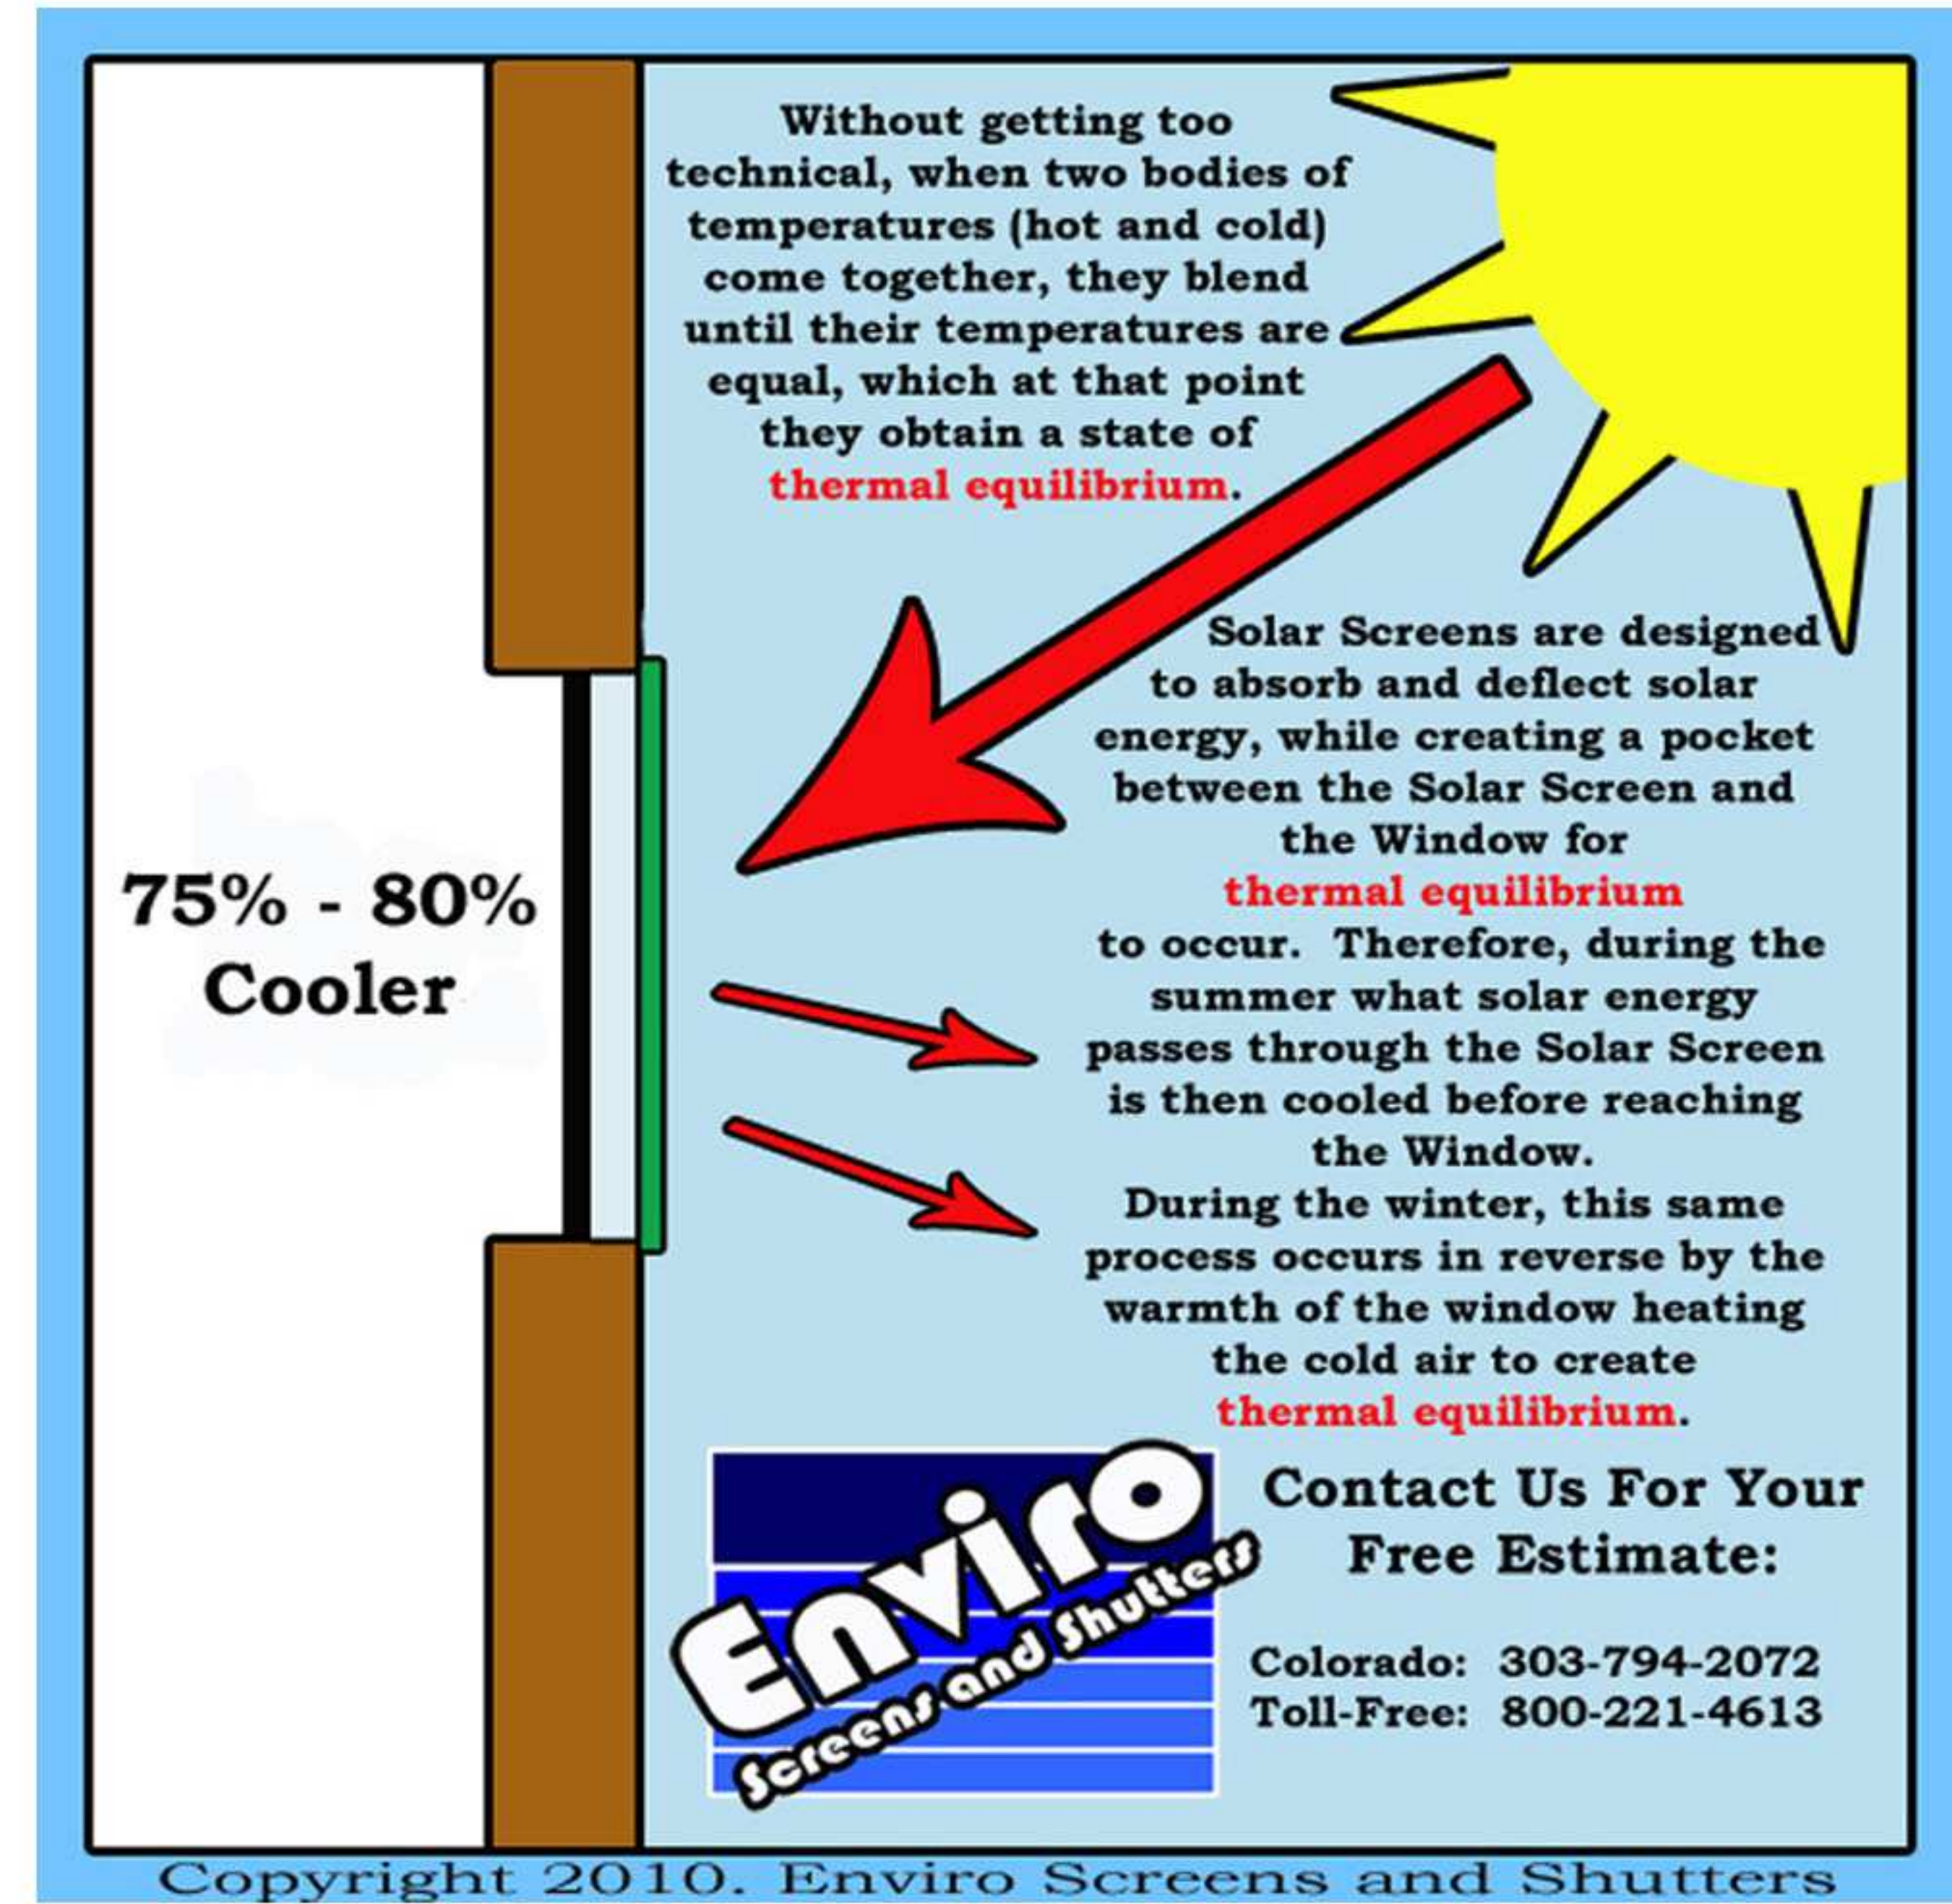

Source: U.S. Dept. of Energy and HUD

- The ultimate in energy savings
- 80% - 90% energy reduction
- Reduces sun damage to floors, carpeting, furniture, drapes, etc.
- Screen fabric has 10 year warranty
- Reduces glare inside the home
- 5 different screen colors
- 4 difference frame colors

We can manufacture your EnviroCool Solar Screens in any color combination and in any style or shape you would like. Our solar screen framing is made of 7/16" x 1" aluminum,

Our screen material is Phifer SunTex 80 and Phifer SunTex 90 with a temperature reduction is as much as 80% and 90%. Phifer SunTex - is a fabric woven of extremely strong and durable vinyl-coated polyester yarns. The uniform weave design offers excellent outward visibility and good ventilation.

The fabric is also pet resistant making it ideal for use in doors and full-length screen panels and has a 10 year warranty.
